Drilling to Commence at the Shihan VMS Property

SUDBURY, Ontario. Rockcliff Resources Inc. is pleased to announce that drilling will commence shortly on its 100% owned Shihan VMS Property located in central Ontario near the town of Missanabie. A minimum of 3,000 metres of drilling is planned to commence in January.

Drilling will initially focus on the Zinc Zone and its potential extensions. The Zinc Zone mineralization consists of stringers and massive sulphide lenses containing zinc, copper, lead, silver and gold. The Zinc Zone is exposed on surface for a distance of 30 metres and is up to 6 metres wide. It is open along strike and at depth. Assay results for due diligence grab samples collected by Rockcliff on the zone and the surrounding alteration envelope are tabulated below:

SAMPLE	ZINC %	COPPER %	LEAD %	SILVER ppm	GOLD ppb
41301	58.15	0.02	0.64	66.6	56
41302	59.60	0.02	1.14	113.8	48
41303	51.50	0.04	0.85	237.4	125
41304	53.00	0.07	0.65	158.7	112
41305	48.50	0.05	0.34	143.7	248
41306	0.49	0.01	1.16	179.4	301
41307	21.74	0.12	0.11	200.7	180
41308	14.74	0.14	0.08	81.5	413
41309	6.92	0.05	0.05	36.2	264
41310	3.25	0.30	0.10	140.5	182
41311	10.65	0.28	0.04	75.8	617
41312	0.06	0.01	0.03	128.1	176
41313	4.88	0.21	0.02	65.1	114
41314	2.97	2.97	0.03	297.6	452
41315	1.57	0.04	0.01	68.0	104
41316	0.66	0.03	0.03	24.9	493
41317	0.02	0.40	0.01	41.3	710

Additional drilling will test areas identified in a helicopter-borne AeroTEM II Electromagnetic and Magnetometer Survey completed for Rockcliff by Aeroquest Limited in July of 2006. Multiple, high priority, geophysical conductors were located throughout the 25 km long property. The untested conductors were identified as areas with VMS and/or gold potential.

Secured rock samples from the property were sent to Laboratoire Expert in Rouyn-Noranda, Quebec for analytical work. Samples were analyzed for zinc, copper, lead and silver by total digestion followed by atomic absorption analysis. Gold concentrations were determined by fire assay with an ICP-MS finish. Laboratoire Expert fulfilled standard QA/QC protocols.

The drill program will be under the supervision of Peter Wood, P.Eng., P.Geo., VP Exploration of Rockcliff, a qualified person under the definition of National Instrument 43-101.

About Rockcliff Resources Inc.

Rockcliff Resources Inc. is a Canadian resource exploration company focused on the acquisition and development of high-quality mineral assets associated with world class geology and in world class mining camps.

For more information please visit our website at www.rockcliffresources.com or contact Ken Lapierre, P.Geol., President and CEO of Rockcliff Resources Inc. at (705) 688-9800 or therock@rockcliffresources.com.

Forward Looking Statement:

Some of the statements contained herein may be forward-looking statements which involve known and unknown risks and uncertainties. Without limitation, statements regarding potential mineralization and resources, exploration results, and future plans and objectives of the Company are forward looking statements that involve various risks. The following are important factors that could cause the Company's actual results to differ materially from those expressed or implied by such forward looking statements: changes in the world wide price of mineral commodities, general market conditions, risks inherent in mineral exploration, risks associated with development, construction and mining operations, the uncertainty of future profitability and the uncertainty of access to additional capital.
